Dillon's Fight for a Cure

Dillon loves spending time with his family as much as he loves baseball, music, and eating gourmet food. In 2005, Dillon was diagnosed with Niemann-Pick Type C, which is a rare, devastating and always fatal disease that effects only 500 cases world wide.

The symptoms of this disease include enlarged spleen and liver, clumsiness and loss of muscle control, deterioration of speech, seizures, and progressive neurological and intellectual decline. Many children die before the age of 10, or within 5-10 yrs of the diagnosis.

With your generosity the National Niemann-Pick Disease Foundation, Inc. can achieve the necessary funding for critical research in hope of a successful treatment in time to spare Dillon and the other children from the devastating affects of this fatal disease that robs them of our most precious gift—life.
